ERGOFRAME
Trolley for interactive whiteboard

The most interactive whiteboards are sold with fixed wallmounting brackets, but the real benefits of a interactive whiteboard can only be enjoyed if you can adopt the optimum viewing position (eye height).

The ErgoFrame M1 is easy *height adjustable* with the use of gas springs and is easy transportable because of the robust *trolley*. The real benefit of the ErgoFrame M1 is that a "Super Close Projection Beamer" can be mounted on the frame. Because of this, the system is optimal mobile. The system does not need to be calibrated and installed after every transportation.

The ErgoFrame M1 can be used with the 3M Digital Media System 800/801 and SMART Unifi Beamer.
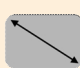

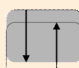

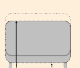

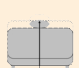

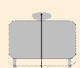

The ErgoFrame M1 offers a complete solution for the most accepted interactive systems currently available on the market. The *ErgoFrame fits* the following whiteboards..

- *SmartBoard*
- *Activeboard*
- *Focus Board*
- *I-Board*
- *Communicator*
- *Penboard*

ErgoFrame can be build-up from the following components and can be added to the ErgoFrame M1

M1	ErgoFrame	Standard trolley
M2	ErgoFrame Swivel	Beamer-swivel-System
M3	ErgoFrame Cover	Beamer protection cage
M4	ErgoFrame Cover Security	Beamer anti-theft protection cage
M5	ErgoFrame CPU Cabinet	Lockable CPU Cabinet / Notebook Cabinet
M6	ErgoFrame CPU Holder	CPU Holder
